FOR IMMEDIATE RELEASE

Trois-Rivières, Sunday, January 23rd, 2011

Progipac Group remains fully operational despite a fire in its offices

Part of PROGIPAC GROUP's offices were ravaged by flames on Saturday, January 23rd, 2011.

PROGIPAC GROUP's management wants to reassure its clients that all data was safeguarded and that all services will be fully maintained. No loss of information has occurred, backups were not required and operations are functional therefore it will be business as usual for its clients on Monday morning. Operations are up and running, ready to process clients' requests.

However, considering the extent of the damages to the building's structure, the Company's twenty two employees and installations were relocated just a few streets from the damaged offices. PROGIPAC GROUP's team will continue to serve their clients from their new location at 4450 des Forges boulevard in Trois-Rivières, for an undetermined period.

The PROGIPAC GROUP employees came together during this weekend to ensure this unfortunate event has no impact on day-to-day operations.

PROGIPAC GROUP develops software and online services for the automobile industry. Their efficient solutions are adapted specifically to the needs of this industry by linking recycling centers, collision shops and other participants in this field.
