

PROGI HAS COMPLETED A SSAE 16 AND CSAE 3416 AUDIT

Trois-Rivières, Tuesday July 27, 2015

Progi.com Inc., a developer of digital solutions for insurers, repair shops and parts suppliers from the automotive industry, has completed an independent audit on controls at a service organization under the SSAE 16 (Statement on Standards for Attestation Engagements N.16) and CSAE 3416 (Canadian Standard on Assurance Engagements) as of October 31, 2014. These standards were established by the American Institute of Certified Public Accountants Association for the SSAE 16 and by the Auditing and Assurance Standards Board for the CSAE 3416 to help businesses demonstrate the integrity and safety of their internal control processes in a context which increasingly relies on externalization.

Because Progi manages and hosts clients' data, the company made it a point to obtain this certification to strengthen and preserve their clients' trust.

Pierre-Alexandre Tremblay, financial director at Progi states that this certification attests to the quality and integrity of the control processes that were defined and implemented to protect the clients' data.

In order to obtain this certification, audits verified the company's safety policy, logical and physical access to the programming environment, data privacy, IT infrastructure operations, backups, human resources, training, hiring process, and physical safety and risk management.

Committed to excellence, Progi is proud to offer its clients and to communicate to them their SSAE 16 and CSAE 3416 report on controls at a service organization that covers its security and internal control processes.
