

## PRESS RELEASE

*For immediate release*

### Official Inauguration of Progi.com Inc. Headquarters

Trois-Rivières, Québec, June 6, 2017 — On June 7th, Progi.com Inc. (Progi) will inaugurate its new offices located at 500 rue Saint-Georges in Trois-Rivières. The company acquired the building last year which is also known for having housed the Nouvelliste and the CLSC des Forges in the past.

With this initiative, Progi takes part in revitalizing downtown Trois-Rivières. Since last October, employees have been sharing the place with contractors busy with final adjustments and finishing touches. The personnel nicknamed their new premises the ProgiPlex.

The new offices offer more space to accommodate Progi's constant growth. Several changes were made to the old building. The first floor was entirely refurbished to meet the employees' needs. Open areas bathed in natural sunlight are home to the development team and customer service team. All offices have large windows to maximize lighting. Modern conference rooms are available for meetings and training.

A third floor was added to the original building for the dining area and an additional conference room. An exterior deck with a downtown view was also built. The move allowed the company to upgrade its servers' room with more expansion in mind.

Part of the ground floor will be offered for rent. Progi will also use some of that space for its growing team.

Diane Chaîné, president of Progi, says: "I am glad to offer the Progi team a modern and comfortable environment which helps to make each hour spent at work healthy and positive. We now have the space to accommodate any new talent that may join our team".

For the inauguration, Progi will host employees and their families as well as the enterprise's clients in a 4-6 Happy Hour formula. **Medias** are also invited to the event.

#### About Progi

Well established in Canada since 1990, Progi develops digital solutions for the insurance, vehicle repair and used parts sales industries. These solutions improve communication and business processes offering companies a better performance.
